**Ophthalmologist:** a medical doctor (MD) or a doctor of osteopathic medicine (DO) who specializes in eye and vision care. Ophthalmologists are trained to perform eye exams, diagnose and treat disease, prescribe medications and perform eye surgery. They also write prescriptions for eyeglasses and contact lenses.

**Optometrist:** an eye doctor who has earned the Doctor of Optometry (OD) degree. Optometrists examine eyes for both vision and health problems, and correct refractive errors by prescribing eyeglasses and contact lenses. Some optometrists also provide low vision care and vision therapy. Optometrists in the United States also are licensed to prescribe medications to treat certain eye problems and diseases.
